

Contents

Introduction	v
Agriculture and Soil Microbiology	
Ability of <i>Ralstonia solanacearum</i> phylotype II to adapt to environmental prevailing factors in water <i>Belén Álvarez, María M. López and Elena G. Biosca</i>	3
Analysis of microbial communities under long-term conventional and reduced-input management of tillage soil <i>Sagar Chhabra, Jill Hogan, David Ryan, Jim Burke, Dina Brazil and David N. Dowling</i>	8
Antimicrobial activity of chitosan against <i>Fusarium oxysporum</i> f. sp. <i>tracheiphilum</i> <i>T.C.M. Stamford, S.R.C. Alcântara, L.R.R. Berger, N.P. Stamford, M.C.F. Silva, T.K.S. Borges, D. Laranjeiras and G.M. Campos-Takaki</i>	12
Aspects about virulence and epiphytic fitness of <i>Pseudomonas syringae</i> pv. <i>syringae</i> strains isolated from mango trees <i>E. Arrebola, V. Carrión, J.C. Codina, A. Pérez-García, F.M. Cazorla and A. de Vicente</i>	16
Characterization of rhizospheric bacteria isolated from maca (<i>Lepidium meyenii</i> W.) in the highlands of Junin-Peru <i>D. Zúñiga Dávila, J. Tolentino Macalupú, M. García Wong, W. Pérez Porras, M. Matsubara Bautista and K. Ogata Gutiérrez</i>	21
Detection of group I and group II introns in a Mexican <i>Bacillus thuringiensis</i> collection <i>A. Espino-Vázquez, A. Solís-Soto, H.A. Luna-Olvera, H. Medrano-Roldán and B. Pereyra-Alfárez</i>	26
Determination of soil microbial community fluctuations by different techniques in a maize field <i>Ana Muñoz, Antonio López-Piñeiro, José A. Regodón and Manuel Ramírez</i>	31
Differences between microbial communities in worm guts and the soils they inhabit <i>R.M. Simpson, M. Picquet and M. Deurer</i>	36
Effect of different rhizospheric bacteria in the growth of <i>Gossypium barbadense</i> L. in Perú <i>D. Yino Oshiro, L. Ramos Pajuelo, M. Matsubara Bautista, L. Espinoza Melgar and D. Zúñiga Dávila</i>	41
Effect of <i>in vivo</i> passage on spore germination and virulence of <i>Verticillium lecanii</i> <i>Ali Derakhshan</i>	45
<i>Erwinia amylovora</i> colonization of host plants inoculated by irrigation <i>R.D. Santander, E. Marco-Noales, M. Ordax and E.G. Biosca</i>	48
Evaluation of flow cytometry to assess <i>Erwinia amylovora</i> viability under different stress conditions <i>R.D. Santander, J.F. Catalá-Senent, M. Ordax, A. Flores, E. Marco-Noales and E.G. Biosca</i>	51
Genetic variability analysis of entomopathogenic fungi isolated from citrus-growing areas of Mexico <i>A.L. Galán-Franco, K. Arévalo-Niño, M. Elías-Santos, A Morales-Loredo, G. Alvarez-Ojeda, J.I. López-Arroyo and I. Quintero-Zapata</i>	55
Identification of virulence genes in <i>Fusarium oxysporum</i> f. sp. <i>lycopersici</i> the causal agent of tomato wilt disease <i>M.L.R. Bastos da Silva, M.C.C. Pereira de Lyra, I.R. Souza Arruda, M. Vanusa da Silva and J. Zoé Brito</i>	59
Influence of organic and conventional soil management system on soil respiration and enzymatic activity <i>L. Dubova, V. Šteinberga, O. Mutere, I. Jansone and I. Alsiņa</i>	61

Microbial analysis of soils from avocado crop modified by organic amendments <i>N. Bonilla, F.M. Cazorla, J.M. Hermoso, J. González, J.A. Torés and A. de Vicente</i>	66
Modeling of nitrogen leaching by using urea fertilizer in sandy loam soil <i>Khalil Ajdary and Hamid Zare Abianeh</i>	71
Mutual influence of the non-symbiotic soil basidiomycete, <i>Stropharia rugoso-annulata</i> and white mustard plants on their enzymatic activities under natural conditions <i>G. Gramss and H. Bergmann</i>	76
Nematicidal activity of <i>Solanum sisymbriifolium</i> and <i>S. nigrum</i> extracts against the root-lesion nematode <i>Pratylenchus goodeyi</i> <i>M. Pestana, M. Rodrigues, L. Teixeira, I.M. de O. Abrantes, M. Gouveia and N. Cordeiro</i>	81
Particular characteristics of soil microbial communities in forest stands infected with <i>Heterobasidion parviporum</i> and <i>Armillaria</i> spp. <i>L. Grantina, E. Seile, U. Malinovskis, G. Tabors, R. Kasparinskis, V. Nikolajeva and I. Muiznieks</i>	86
Pathogenic bacteria can produce exopolysaccharides and use them as carbon source under stress conditions: the case of <i>Erwinia amylovora</i> <i>M. Ordax, E. Marco-Noales, M.M. López and E.G. Biosca</i>	92
Phenotypic characterization and the application of the rep-PCR technique in a study of new strains of <i>Bacillus thuringiensis</i> in the South of Brazil <i>G. Cristina Alles, V. Machado and L. Mariana Fiuza</i>	96
<i>Phytophthora parasitica</i> showing host specificity and pathogenic ability on tomato and sweet pepper <i>M. de Cara, D. Palmero, C. Durán, C. Lacasa, M. Santos, M.D. Coffey and J.C. Tello</i>	101
Polybiotrophy of <i>Serratia marcescens</i> , a causative agent of an onion disease in arid zone of the South of Ukraine <i>L. Ovcharenko, T. Voznyuk, I. Zaetz, A. Potopalsky, O. Reva and N. Kozyrovska</i>	106
Polyphenol oxidase in golden chanterelle (<i>Cantharellus cibarius</i>) mushroom <i>Jacqueline Keyhani and Ezzatollah Keyhani</i>	111
Prevalence of plant pathogenic isolates of airborne <i>Fusarium</i> species in south east coast of Spain <i>D. Palmero, J.M. Rodríguez, M. de Cara, F. Camacho, C. Iglesias and J.C. Tello</i>	116
Production of beer using sorghum and sorghum malt <i>P.J. Segura, M. Lozano-Contreras, V. Mojica-Marín, M.G. Maldonado-Blanco, H.A. Luna-Olvera, J.L. Meza-García, B. Pereyra-Alferéz, I. Quintero-Zapata and M. Elías-Santos</i>	121
Sequencing of the region of ribosomal internal transcribed spacer (ITS) of <i>Metarhizium anisopliae</i> in Pernambuco state <i>M.L.R.B da Silva, V.A.L.B Cavalcanti, A.C.E.S Mergulhão and M.C.C.P de Lyra</i>	125
Soil bioremediation of atrazine pesticide by two strains of soil microorganism <i>Ana Muñoz, Antonio López-Piñero, José. A. Regodón and Manuel Ramírez</i>	129
Study on the effects of nitrogen, glucose and plant residues on soil microbial C <i>S. Shahsavani and G. Shakeri</i>	132
The toxicity and histopathology of <i>Bacillus thuringiensis</i> Cry1Ba toxin to <i>Spodoptera frugiperda</i> (Lepidoptera, Noctuidae) <i>L. Massochin Nunes Pinto, N. Carolina Drebes Dörr and L. Mariana Fiuza</i>	137
Environmental Microbiology	
A bacterial consortium alleviated a low-dose gamma-irradiation effect in <i>Kalanchoe</i> plantlets <i>O.P. Boorlak, I.S. Rogutskyy, B.A. Danilchenko, O.M. Mikheev, I.Ye. Zaets, A.I. Vasilenko, J.-P. de Vera, B.H. Foing and N.O. Kozyrovska</i>	143

Assessment of the collaboration between fungi and bacteria during the oxalate-carbonate pathway in microcosms <i>M. Guggiari, G. Martin, M. Aragno, E. Verrecchia and D. Job</i>	148
Diversity of foaming producing nocardioform actinomycetes from wastewater treatment plants in Spain <i>G. Cuesta, A. Soler, J.L. Alonso, J.J. Morenilla and Bernacer I</i>	153
Effect of a respiratory inhibitor on the bioconversion of a xenobiotic by activated sludge <i>A.M.T. Mata, N.D. Lourenço and H.M. Pinheiro</i>	158
Environmental impact on <i>Rhizobium sp.</i> cells <i>Radha Bhattacharya</i>	163
INDISIM-SOM: an individual-based simulator on a website for experimenting with and investigating diverse dynamics of carbon and nitrogen in mineral soils <i>A. Gras, J.C. Cañadas and M. Ginovart</i>	167
Influence of the fungicide Benomyl and ecophysiological factors on growth rate of <i>Fusarium verticillioides</i> and <i>Fusarium proliferatum</i> from Spain <i>P. Marín, N. Magan, A. Cruz and M.T. González-Jaén</i>	172
Influence of the heavy metals on chitosan production by <i>Absidia corymbifera</i> UCP 0134 <i>A. Cardoso, A. Marques, P. Homero Campos Marinho, R. Kenji Shiosaki and G. Maria Campos Takaki</i>	176
Involvement of oxidative stress in UV-induced impairment of bacterial activity and culturability <i>Ana L. Santos, Inês Baptista, Vanessa Oliveira, Isabel Henriques, Newton C.M. Gomes, Adelaide Almeida, António Correia and Ângela Cunha</i>	181
Isolation of the extreme halophiles from rock salt <i>K. Watanabe, J. Ueda, Y. Sasakawa, M. Watarai, K. Nakamura, K. Yamaguchi, M. Aoki, T. Kanazawa, K. Yamazaki, H. Takee, R. Kushida and N. Kurosawa</i>	185
Quantification and toxicity testing of pharmaceuticals in tropical marine sediments, All Saints Bay, Bahia, Brazil <i>M. Beretta, L. Wessels Perelo and I. Brandão de Oliveira</i>	187
Relationships between hydrophobicity and biofilm formation in <i>Streptococcus agalactiae</i> strains <i>V. Giummarra, M.C. Scuderi, G. Tempera, L.S. Roccasalva and P.M. Furneri</i>	192
Role of catalases in isolates of genus <i>Comamonas</i> from a polluted environment <i>M. Bučková, J. Godočíková, M. Zámocký and B. Polek</i>	195
<i>Saccharomyces cerevisiae</i> UE-ME ₃ is a good strain for isoproturon bioremediation? <i>M. Candeias, I. Alves-Pereira and R. Ferreira</i>	199
Thermophilic bacteria isolated from a personal-use composting reactor <i>K. Watanabe, Y. Nakane, K. Nakagawa, T. Sakaguchi and N. Kurosawa</i>	204
Ultrastructural behavior of <i>Rhodotorula mucilaginosa</i> induced by the growth in presence of pyrene <i>P. Homero Marinho, P. Mendes Souza, M. Antônio Lima, R. Burgos, A. Cardoso, A. Elesbão Nascimento and G. Campos Takaki</i>	209
Vanadium pentoxide: an oxidative stress agent which disturbs glutathione conjugates metabolism in <i>Saccharomyces cerevisiae</i> UE-ME ₃ <i>S. Gonçalves, R. Ferreira and I. Alves-Pereira</i>	214
Vertical profile of bacterial community in the sediment of Ulleung Basin: implication of the presence of methane-driven community <i>In Soon Jeong, Jang-Cheon Cho, Jang-Jun Bahk, Sang Min Hyun, Kae Kyoung Kwon, Jung Hun Lee, Sung Gyun Kang, Sang Hee Lee and Jung-Hyun Lee</i>	219

Volatile fatty acids separation by ion exchange chromatography in fixed bed column <i>A.C. Malvestio, M. Barboza, J.A.C. Leite and M. Zaiat</i>	227
--	-----

Bioremediation

Bioremediation of heavy metals through symbiosis between leguminous plant and rhizobium with engineered metallothionein and phytochelatin synthase genes <i>Yoshikatsu Murooka, Akiko Ike and Mitsuo Yamashita</i>	235
---	-----

Influence of readily assimilated carbon sources on the phenol degradation of <i>Trichosporon cutaneum</i> R57 strain <i>M. Gerginova, N. Shivarova, N. Peneva, H. Yemendzhiev and Z. Alexieva</i>	239
--	-----

Reactive Violet 12 dye decolorization by mycelial culture of <i>Trametes versicolor</i> <i>A. Krastanov, H. Yemendzhiev, I. Stoilova and Z. Alexieva</i>	244
---	-----

Spent mushroom substrate from the industrial cultivation of <i>P. ostreatus</i> for discoloring complex chromo-baths for the textile industry: white rot fungi for a sustainable approach to wastewater treatment <i>Simona Di Gregorio, Francesco Balestri, Maria Basile, Valentina Matteini, Francesco Gini, Stefania Giansanti, Maria Grazia Tozzi, Riccardo Basosi and Roberto Lorenzi</i>	248
---	-----

Sustainable remediation of polycyclic aromatic hydrocarbon contaminated soils using a two-step bioremediation process <i>J. Hall, R. Stewart, B. Dearman and A.S. Ball</i>	252
---	-----

The decolorization of azo dyes by <i>Trametes versicolor</i> under the influence of different glucose concentrations <i>H. Yemendzhiev, Z. Alexieva, I. Stoilova and A. Krastanov</i>	257
--	-----

The sequential photo-biodegradation of MCPA with the use of excilamps <i>Karetnikova Elena A., Tchaikovskaya Olga N., Sokolova Irina V. and Kaharova Anna I.</i>	261
---	-----

Uranium adsorption by <i>Articulospora tetracladia</i> : can aquatic hyphomycetes be natural bioremediators of uranium contaminated streams? <i>V. Ferreira, A.L. Gonçalves, J. Pratas and C. Canhoto</i>	265
--	-----

Biofilms

Biofilm development during an anaerobic wastewater treatment process <i>I. Schneider and Y. Topalova</i>	273
---	-----

Biofilm formation by algae on sandstone monuments and their inhibition: a case study of Agra (India) <i>Alka Jain and Seema Bhadauria</i>	277
--	-----

Comparison of methods for the detection of biofilm production in coagulase-negative staphylococci <i>A. Oliveira, M. Fávero Bonesso and M.L.R. de Souza da Cunha</i>	281
---	-----

Differences between clinical and food isolates of <i>Listeria monocytogenes</i> in biofilm formation <i>J. Barbosa, V. Ferreira, S. Borges, R. Camilo, J. Silva, R. Magalhães, I. Santos, G. Almeida, P. Gibbs and P. Teixeira</i>	286
---	-----

Industrial Microbiology

Biocidal potential of essential oils of <i>Piper aduncum</i> , <i>Piper hispidinervum</i> and <i>Syzygium aromaticum</i> on important pathogenic and toxigenic microorganisms important for food <i>C.R. Giviziez, L.R. Batista, M.G. Cardoso, W.C. Ferreira, C.R. Bottura and M.C. Andrade</i>	291
--	-----

Bioprospection of microorganisms for lipase production using an industrial waste as carbon source <i>D. Silva Gomes, E.L. Vera Cruz, L. Asfora Sarubbo, G.M. Campos Takaki and A. Amorim Salgueiro</i>	294
---	-----

Biosynthesis of the lipids by the yeasts <i>Rhodotorula gracilis</i> <i>Sergiy Shulga, Alla Tkachenko and Nataly Beyko</i>	298
Degradation assay of lignocellulosic compounds in combination with polyurethane resin by CECT fungi <i>F. Llinares, R. Díaz, M. De Troya and P. Jiménez</i>	303
Design of surface response analysis of K_{La} depending on aeration and agitation rate in a 14 L bioreactor <i>F. Rodríguez-Gómez, M. Lozano-Contreras, M.G. Maldonado-Blanco, H.A. Luna-Olvera, C.F. Sandoval Coronado, F. Vilcanquí-Pérez, L.J. Galan-Wong and M. Elías-Santos</i>	308
Effect of oxidized cellulose on probiotic bacteria <i>P. Snevajsova, J. Vytrasova and J. Remesova</i>	313
Effect of pH and inoculum percentage on canthaxanthin production by <i>Dietzia maris</i> <i>G. Goswami, S. Chaudhuri and D. Dutta</i>	318
Isolation and characterization of cellulase producing bacteria from pruning tree compost and soil <i>Junko Ueda, Keiko Watanabe, Shuichi Yamamoto and Norio Kurosawa</i>	323
Mixture design of agricultural waste substrates for laccase production from white rot fungus <i>T. Chairin, C. Khanongnuch and S. Lumyong</i>	328
Optimization of a protoplast transformation method for <i>Bacillus subtilis</i> , <i>Bacillus megaterium</i> , and <i>Bacillus cereus</i> by a plasmid pHIS1525.Sp _{lipA} <i>A. Mirabdollah, S. Alinezhad, E. Feuk-Lagerstedt and I. Sárvári Horváth</i>	333
Optimization of the continuous clavulanic acid adsorption process <i>Renata M.R.G. Almeida, Marlei B. Pasotto and Carlos O. Hokka</i>	337
Potential of microbial consortium for biological treatment of the effluent from cassava flour production <i>E.L. Vera Cruz, R. Albuquerque Lima, L. Asfora Sarubbo, G.M. Campos Takaki and A. Amorim Salgueiro</i>	343
<i>Salmonella enterica</i> Typhimurium: establishment of cultivation condition on shake flask and flagellin isolation strategy by using tangencial ultrafiltration <i>B.H. Oliveira, M.R. Silva, C.J.M. Braga, L.M. Massis, L.C.S. Ferreira and M.E. Sbrogio-Almeida M. Takagi</i>	348
Food Microbiology	
Antimicrobial activity of extracts from different <i>Origanum vulgare</i> clones grown in Latvia <i>I. Alsina, L. Dubova, Z. Krūma, J. Krainis, I. Žukauska and R. Galoburda</i>	355
Behavior of Shiga-toxin-producing <i>Escherichia coli</i> (STEC) of serotype O113:H21 to front pH, water activity, time and temperature <i>L. Justo Beserra, A.M. Figueiredo Cerqueira, K.G. de Lima Araújo, J.R. Costa Andrade and A.G. Martins Gonzalez</i>	359
Betalactam resistance in food <i>Escherichia coli</i> isolated from broilers <i>Kmet Vladimir, Dobroslava Bujnakova, Zuzana Drugdova and Marta Kmetova</i>	363
Biocontrol of <i>Penicillium expansum</i> with yeast <i>M. Domenech Lucas, C. Vázquez Estévez, M.T. González-Jaén and B. Patiño Álvarez</i>	366
Detection and antibiotic susceptibility of coliform bacteria in fresh vegetables <i>M.P. Falomir, D. Gozalbo, C. Sebastia and H. Rico</i>	372
Effect of carbendazim and water activity on the growth of <i>Aspergillus ochraceus</i> and ochratoxin A accumulation in solid medium containing bee pollen <i>M.A. García-Esparza, Eva M. Mateo, F.M. Valle-Algarra, R. Mateo-Castro and M. Jiménez</i>	377

Efficacy of three antifungal chemicals on the growth <i>in vitro</i> of <i>Aspergillus ochraceus</i> and <i>Aspergillus carbonarius</i> strains isolated from Spanish barley <i>Eva M. Mateo, A. Medina, F.M. Valle-Algarra, F. Mateo, M.A. García Esparza and M. Jiménez</i>	381
Evaluation of the persistence of viable <i>L. monocytogenes</i> cells in chlorinated water <i>Y. Moreno, M.C. Sanchís, L. Ballesteros, A. González and M.A. Ferrús</i>	386
<i>Fusarium</i> spp. occurrence in feeds and cereal grains (Portugal-2007) <i>Inês Almeida, H. Marina Martins, Marta Marques and F. Bernardo</i>	391
Identification and characterization of yeasts isolated from oleic ecosystems <i>Sheila Romo-Sánchez, Milla Alves-Baffi, María Arévalo-Villena, Juan Úbeda-Iranzo and Ana Briones-Pérez</i>	393
Identification of molds associated with green table olives <i>F. Pérez-Nevado, P.P. Mateos, A. Hernández, A. Martín, M.J. Benito, S. Ruiz-Moyano and M.G. Córdoba</i>	398
<i>In vitro</i> effect of lactic acid bacteria isolated from guirra sheep against <i>Salmonella</i> spp. <i>C.M. Amoroch Cruz, J. García Hernández, Y. Moreno Trigos, A. Jiménez Belenguer, M.A. Ferrús Pérez and M. Hernández Pérez</i>	403
Lactic acid bacteria from wines from Ribeira Sacra (Spain): isolation, identification and characterization of some oenological properties <i>J.M. Mesas, M.T. Alegre Arribas and M.C. Rodríguez Pérez</i>	408
Occurrence of ochratoxin A in plasma from Valencian citizens and resemblance with previous Spanish data <i>A. Medina, F. Mateo, Eva M. Mateo, R.J. Roig, A. Blanquer, V. Mirabet and M. Jiménez</i>	413
Partial fermentation of musts from Tempranillo dried grapes <i>N. López de Lerma, J.J. Moreno and R.A. Peinado</i>	418
Presence of <i>Arcobacter</i> spp. contamination in fresh lettuces for human consumption <i>A. González, E. Yeres, C.M. Gentil de Farias, Y. Moreno and M.A. Ferrús</i>	422
Production of patulin by <i>Penicillium expansum</i> in different culture media including bee pollen media <i>F.M. Valle-Algarra, Eva M. Mateo, M.A. García-Esparza, R. Mateo, J.V. Gimeno-Adelantado and M. Jiménez</i>	426
Selection of <i>Oenococcus oeni</i> as starter cultures to induce malolactic fermentation in Nebbiolo wine <i>Antonella Costantini, Francesca Doria, Enrico Vaudano, Maria Carla Cravero and Emilia Garcia-Moruno</i>	431
Species specific PCR detection protocol for the main mycotoxin-producing <i>Aspergillus</i> species in paprika <i>N. Sardiñas Díaz, J. Gil-Serna, B. Patiño Álvarez, M.T. González-Jaén and C. Vázquez Estévez</i>	436
Standardisation and optimisation of the Alkaline-Tolerance Response (AITR) in <i>Listeria monocytogenes</i> 10403S <i>Efstathios S. Giotis, Ian S. Blair and David A. McDowell</i>	441
Study of cell envelope proteinase systems of natural isolated thermophilic lactobacilli <i>I. Bazukyan, N. Ahabekyan, R. Madoyan, M. Dalgalarondo, J.-M. Chobert, Yu. Popov and T. Haertlé</i>	446
Yeast, beer and fermentation: an opportunity to involve young students in biotechnology <i>Javier Méndez Viera, Joan J. Guinovart and Josep M. Fernández-Novell</i>	451
Medical and Pharmaceutical Microbiology	
An efficient molecular typing assay for <i>Alternaria</i> spp. isolates <i>A. Lança, I. Almeida, H.M. Martins, F. Bernardo, M. Guerra, J. Inácio and M.L. Martins</i>	457

Anatomopathological and mycological findings in two seagull (<i>Larus sp.</i>) infected by <i>Aspergillus fumigatus</i> <i>H. Martins, P. Carvalho, P. Mendonça and M. Monteiro</i>	460
Antimicrobial activity of <i>Thymus vulgaris</i> , <i>Matricaria chamomilla</i> , <i>Croton lechleri</i> , <i>Calendula officinalis</i> L., <i>Julliana adstringens</i> Schl against periodontopathogen microorganisms <i>A. Rodríguez García, L.J. Galán Wong, G. Rojas Verde and K. Arévalo Niño</i>	463
Chemical and pharmacological study of Brazilian marine <i>Streptomyces</i> <i>Ana Claudia Granato, Luis H. Romano, Jaine H.H.L. Oliveira, Regiane P. Ratti, Isara L.C. Hernandez, Raquel C. Montenegro, Marlei Barboza, Cristina P. Souza, Carlos O. Hokka and Milan Trsic</i>	468
Determination of mode of action for novel synthetic antifungal agents using reversal assay method <i>M. Mahboubi, S. Sardari, V. Khalaj and M. Mehravar</i>	473
Effect of plants used in Mexican traditional medicine on <i>Candida albicans</i> biofilm <i>J. Sardi-de Cássia Orlandi, I. Peixoto-Teixeira Alves, J.F. Höfling, B. Gonçalves-Reginaldo, A. Rodríguez-García, L.J. Galán-Wong, K. Arévalo-Niño, C. Pierce and J.L. López-Ribot</i>	476
<i>In vitro</i> evaluation of biopolymers as delivery system of plant extracts on cultures of <i>Porphyromonas gingivalis</i> and <i>Aggregatibacter actinomycetemcomitans</i> <i>A. Rodríguez García, L.J. Galán Wong, J. Verde Star, M.S. Flores González and K. Arévalo Niño</i>	479
<i>In vitro</i> tests of antifungal activity of plants used in Mexican traditional medicine <i>I. Peixoto Teixeira Alves, M.A. De la Garza-Ramos, L.J. Galán Wong, K. Arévalo Niño and A. Rodríguez García</i>	484
<i>In vitro</i> tests of biopolymers with extracts from plants used in Mexican traditional medicine on <i>Candida albicans</i> biofilm <i>J. de Cássia Orlandi Sardi, I. Teixeira Alves Peixoto, J.F. Höfling, R. Bruno Gonçalves, A. Rodríguez García, L.J. Galán Wong, K. Arévalo Niño, J.L. López Ribot and C. Pierce</i>	488
Influence of patient care with invasive devices on the risk of healthcare-associated infections <i>Diana Platace, Ilze Klava, Lilija Antonevica, Aigars Reinis, Valentina Kuznecova, Juta Kroica and Inga Millere</i>	492
Invasive infection by <i>Trichosporon mucoides</i> following circovirus infection in a parrot <i>H. Martins, P. Carvalho, P. Mendonça, T. Fagulha, A.M. Henriques and M. Monteiro</i>	496
Isolation and screening of soil microorganisms for membrane-active antimicrobial metabolites <i>M. Mehravar, S. Sardari, M. Mahboubi and P. Owlia</i>	501
Lactic acid bacteria from the vagina of healthy Turkish women: identification, hydrogen peroxide production <i>Merih Kivanç, Demet Yazıcıoğlu and Emine Dinçer</i>	506
Methicillin-resistant <i>Staphylococcus aureus</i> in Brazil: classification of SCCmec and virulence factors <i>M.V. Pimenta Rodrigues, C. Sena Martins de Souza, N.B. Teixeira, C.M. Castelo Branco Fortaleza and M.L. Ribeiro de Souza da Cunha</i>	510
Polyphasic characterization of <i>Aspergillus fumigatus</i> strains causing infection in parrots and dolphins <i>A. Lança, I. Almeida, H.M. Martins, F. Bernardo, M. Guerra, J. Inácio and M.L. Martins</i>	515
<i>Streptococcus intermedius</i> trigger quorum-sensing genes in <i>Porphyromonas gingivalis</i> <i>M.A. De la Garza-Ramos, A. Alcázar-Pizaña, M. Garza-Enriquez, R. Caffesse, V. Aguirre-Arzola, L.J. Galán-Wong and B. Pereyra-Alfárez</i>	518
Synergistic antimicrobial activity among hydroalcoholic extract of leaves of trees in the Brazilian territory common <i>Cristiane Karina Malvezzi, Jacqueline Stella Barbosa de Souza and Silvio Silvério da Silva</i>	522

Syzygium aromaticum (clove) extract reduce virulence factors mediated by QS in Gram negative bacteria F. Llinares, M.J. Pozuelo, S. Casado, C. de Blas, J.A. Pinilla, J. García de los Ríos and P.A. Jiménez.....	525
---	-----

Biotechnologically Relevant Enzymes and Proteins

Biotechnological potential of an extracellular peroxidase from <i>Streptomyces albus</i> A.S. Ball, C. Kleisiari, M. Hernández and M.E. Arias.....	533
---	-----

Characterization of the optimal conditions for the cultivation of <i>Cladosporium cladosporioide</i> (Fres.) de Vries and isolation of the pectinase produced in solid-state conditions S. Carvalho Bastos, C. José Pimenta, S. Maria Chalfoun Souza, L. Silveira Tavares, Disney Ribeiro Dias and L. Martinez Abreu Soares Costa.....	538
---	-----

Comparative study of modified versus natural human basic Fibroblast Growth Factor (hbFGF) in survival and proliferation of 3T3 cells Amir Amanzadeh, Mona Alibolandi, Mojgan Khayat Moghadam and Hasan Mirzahoseini.....	543
--	-----

Effect of cell surface components on ASABF- α susceptibility in <i>Staphylococcus aureus</i> : a resistance mechanism involving cell wall alteration Melody Tsai, Yusuke Kato and Kazuya Morikawa.....	546
---	-----

Exploring the biotechnological applications of a halotolerant pH-versatile laccase produced by <i>Streptomyces ipomoea</i> CECT 3341 Manuel Hernández, Raquel Moya, José M. Molina-Guijarro, Francisco Guillén and M. Enriqueta Arias.....	550
---	-----

Heterologous proteins expression in <i>Escherichia coli</i> : investigation of the effect of codon usage and expression host optimization Hasan Mirzahoseini, Samaneh Mafakheri, Somayeh Enayati and Nahid Mortazavi.....	555
---	-----

Production of amylases, CMCases, xylanases and ligninolytic enzymes by white-rot fungi in solid and liquid fermentation G. Rojas-Verde, M.M. Iracheta-Cárdenas, L.J. Galán-Wong and K. Arévalo-Niño.....	559
--	-----

Utilization of agroindustrial residues as substrates for production of pectinolytic enzymes by the biological agent “G088” C. José Pimenta, L. Martinez Abreu Soares Costa, S. Maria Chalfoun, M. Cláudio Pereira, S. Carvalho Bastos and L. Silveira Tavares.....	564
---	-----

Microfactories — Microbial Production of Chemicals and Pharmaceuticals

Bacteriocin production by bean root bacteria Çiğdem Küçük and Merih Kivanç.....	571
--	-----

Biosynthesis of amino acids sulfur in <i>Saccharomyces cerevisiae</i> is affected by fermentation conditions in beer production C.S. Leal-Guerra, E. Pérez-Ortega, L. Damas-Buenrostro, J.C. Cabada, L. Galán-Wong and B. Pereyra-Alfárez.....	575
---	-----

Chitin and chitosan produced by Mucoralean fungi using a new economic medium corn steep T.C.M. Stamford, M.C. Freitas Silva, L.R.R. Berger, F.S.C. Anjos, S.R.C. Alcântara, N.P. Stamford and G.M. Campos-Takaki.....	579
---	-----

Extraction of clavulanic acid in aqueous two-phase systems followed by separation through ultrafiltration G. Youssef Rodriguez, C. Sacardo da Silva, C. Osamu Hokka and M. Barboza.....	584
--	-----

Growing kinetics and antimicrobial activity of <i>Streptomyces tubercidicus</i> crude extracts R. Priscila Ratti, A.C.M. Toledo Piza, A.C. Granato, C.O. Hokka, J.D. Dubreuil and C. Paiva de Sousa.....	589
--	-----

Isolation and antimicrobial activity of <i>Streptomyces tubercidicus</i> against pathogenic bacteria and fungi <i>R. Priscila Ratti, A.C.M. Toledo Piza, A.C. Granato, C.O. Hokka and C. Paiva de Sousa</i>	593
Isolation, phenogenotypic identification and bioactivity evaluation of endophytic microorganisms intrinsically associated with <i>Miconia albicans</i> in Brazilian tropical savannah tree in Sao Carlos, SP <i>A.C.M. Toledo Piza, R. Priscila Ratti, N.F.G. Serrano, C.O. Hokka, J. Daniel Dubreuil and C. Paiva de Sousa</i>	596
Transformation of nerol with <i>Aspergillus niger</i> in Czapek-Dox medium <i>Takehiko Tsuruta</i>	600
Xylitol production from dilute-acid hydrolysis of bean group shells <i>Chizuru Sasaki, Akihiro Kurosumi, Yuya Yamashita, Godliving Mtui and Yoshitoshi Nakamura</i>	605

Microbial Physiology, Metabolism and Gene Expression

A YARE-like element as the binding site for specific <i>KHIS4</i> transcriptional regulators and its implication in cadmium toxicity <i>M. Lamas-Maceiras and M.A. Freire-Picos</i>	613
Alterations induced by transition metals nickel, cadmium and mercury in <i>Salmonella typhimurium</i> growth and membrane proteins <i>Hossein Tayefi-Nasrabadi and Ezzatollah Keyhani</i>	619
Assaying the single and combined genotoxicity of <i>Calotropis procera</i> Ait latex and chlorcyrin in <i>Aspergillus terreus</i> <i>Jamal S.M. Sabir</i>	624
Construction of a plasmid vector for thermoacidophilic crenarchaeon <i>Sulfolobus acidocaldarius</i> <i>Yoko Kawasaki and Norio Kurosawa</i>	630
Effect of cyanide and azide on growth and membrane proteins in <i>Salmonella typhimurium</i> <i>D. Minai-Tehrani, M. Veissizadeh, E. Keyhani and J. Keyhani</i>	635
Influence of the <i>MTH</i> genes on synthesis of alcohol oxidase and catalase in methylotrophic yeasts <i>Pichia methanolica</i> <i>E.P. Isakova, Y.I. Deryabina and O.A. Leonovich</i>	640
Mobility of Stv1p and Vph1p, the “a” subunit isoforms of the <i>Saccharomyces cerevisiae</i> vacuolar ATPase through late secretory pathway membranes <i>I. Corbacho, F. Teixidó, R. Velázquez, I. Olivero and L.M. Hernández</i>	645
The genotoxicity of three synthetic pesticides: chlorpyrifos, cypermethrin and their mixture chlorcyrin in <i>Aspergillus terreus</i> <i>Jamal S.M. Sabir</i>	649
Transcriptional regulation of <i>ADE2</i> and <i>PUT2</i> genes in <i>Kluyveromyces lactis</i> <i>G. Ruiz Moran, M. Lamas Maceiras and A.M. Rodriguez Torres</i>	654
Yeast vacuole staining using quinacrine and neutral red <i>I. Corbacho, F. Teixidó, R. Velázquez, L.M. Hernández and I. Olivero</i>	659

Methods

A cheminformatics approach to an enriched database of antimycobacterial compounds useful for drug discovery pipeline <i>S. Sardari, B. Shaghghi and H. Borna</i>	665
Aggregation-based <i>in silico</i> study for better understanding of related membrane interfering analogues of Amphotericin B <i>S. Sardari, S. Mostaan and P. Azerang</i>	668

Bacterial growth as nonlocal coherent phenomenon <i>Marcin Molski</i>	672
Capacity of neural network models to predict deoxynivalenol build-up in barley grain contaminated <i>in vitro</i> with <i>Fusarium culmorum</i> <i>F. Mateo, A. Medina, Eva M. Mateo, F.M. Valle-Algarra and M. Jiménez</i>	678
Determination of cell cycle parameters by flow cytometry in bacteria: practical considerations <i>F. Molina, M. Mota, M.A. Sánchez-Romero and A. Jiménez-Sánchez</i>	683
Determination of ethanol in alcoholic drinks using an enzyme biosensor containing alcohol dehydrogenase <i>V. Polan and K. Vytras</i>	688
Growth of <i>Penicillium expansum</i> and production of patulin in potato-glucose-agar medium supplemented with imazalil <i>F.M. Valle-Algarra, Eva M. Mateo, F. Mateo, J.V. Gimeno-Adelantado and M. Jiménez</i>	693
Metabolic reconstruction of <i>Synechococcus elongatus</i> towards a minimal photoautotrophic cell <i>C.M. González-Domenech, J. Puchałka, V.A.P. Martins dos Santos, J. Peretó, A. Moya and L. Delaye</i>	699
Nanocurvatures and “nanocup” formation induced by ethidium bromide in yeast plasma membrane <i>Ezzatollah Keyhani</i>	704
Selectivity-refined <i>in silico</i> analogue finding method for new antifungal molecules based on amphotericin B molecular features <i>M. Ferdosiyani and S. Sardari</i>	709
Structure activity relationship study of the β -lactamase inhibitors and theoretical design for new bioactive compounds <i>Ana Claudia Granato, Edson B. Costa, Marlei Barboza and Milan Trsic</i>	713
