

# INDEX

---

3d educational environments and stereoscopic vision	1-5
A contribution for the evaluation of educational interactive software	6-11
A curriculum for information system courses	12-16
A didactic environment for the study of microprogrammed processors	17-22
A distance learning using the teaching web toolkit	23-26
A doorway to the world without leaving home	27-31
Java based optics virtual laboratory as a support to the teaching of optics in technical degrees	32-36
A java based statics virtual laboratory as a support to the teaching of mechanics in technical degrees	37-42
A methodological design for planning the mathematics syllabus in economics and business administration degree courses	43-45
A model for educational software using artificial intelligence and didactical theories	46-51
A modelling tool for expressing some thoughts in the sciences	52-57
A new simulator of programming for intel 8085 microprocessor.	58-62
A proposal to support Collaborative Learning: using a structure to share context	63-67
A simple, low cost environment for the support of on-line teacher professional development	68-72
A software as a tool for teaching protein synthesis Using an analogy	73-77
A study on Adult Education and Distance Learning	78-80
A teaching and learning strategy using Web resources to monitor students' difficulties and improve their knowledge	81-86
A virtual classroom based on academic memories	87-92
A virtual tool for teaching applications in relation to Analysis techniques by means of ultrasounds	93-97
A Web Environment based on Self-Explanation to Help Students Learn Solving Process in an Artificial Intelligence Course	98-102
A web tool for automatic test evaluation	103-107
A Web-Based Virtual Laboratory of Mechanical Engineering: the Case of Gear Design	108-112
Academic dishonesty in new zealand tertiary institutions: prevalence, penalties and prevention	113-120
Action replay: theorising the enhancement of learning experience through portable technological delivery systems	121-130
AdaptWeb: an Adaptive Web-based Courseware 1 <sup>1</sup>	131-134
Administración de redes con enfoque de ingeniería social	135-138
An adaptive assessment tool integrable into internet-based learning systems	139-143
An Adaptive e-Learning System based on IP Multicast Technology	144-151
An analysis of threaded discussions according to the gricean maxims and their pedagogical implications	152-157
An Approach to e-community support at a University	158-162
An evaluation of web-resources related to pedagogical lexicography	163-167
An introductory course in science education research for swedish in-service teacher training	168-172
An on line environment to support training on the job activities	173-177
Analysis of electronic questionnaire on high education teacher as an evaluation tool	178-182
Analysis of the implementation of technology in educational centers: audiovisual communication in practice.	183-186
Analysis of the structure of the hypermedia information	187-192
Animated presentations as tools for teaching. Organic chemistry laboratory	193-198

---

subjects	
Annotations: though standard in conventional learning a stepchild of elearning	199-203
Aplicación de técnicas xml para la elaboración de material docente y su incorporación en una web didáctica	204-208
Aprendizaje autodirigido en y para la formación docente: hacia un modelo instruccional en línea	209-213
Aprendizaje y trabajo cooperativo en el entorno virtual: reflexion de una experiencia	214-219
Are computers under-used in mathematical teaching for engineers?	220-225
Assessing and developing lexical competence through internet	226-231
Assesment of information needs at the beginning of university studies	232-235
Astronomy: distant education	236-240
Automatic project support	241-245
Axon: hypermedia assisted learning over the web and the analysis of its navigation	246-250
Beliefs and practices of science teachers participating in a project of learning communities with collaborative technology	251-255
Breaking the ict barrier: challenges and opportunities' on the way to the integrative school	256-261
Building a web-based computerized adaptive testing system	262-265
Business models for a european e-learning marketplace	266-270
Caminos a la expresividad: theory and practice of creating an active learning environment for advanced learners of spanish	271-276
Can educational distance collapse in the virtual learning environment?	277-283
Capacitación docente: el reto del milenio	284-290
Challenges of web-based education in physics teachers' training	291-295
Collaborative concept mapping in architectural education	296-301
Collaborative learning in a virtual writing environment	302-306
Combining classroom – based and internet - based learning and teaching strategies in math teachers training	307-311
Coming to terms with information technology in teaching english: useful vs. Undemanded	312-314
Comparing students perception of web-based-education	315-319
Component-orientated software for university teacher degree courses	320-324
Computer aided experiments in science teaching: an integration of possible approaches in web environment	325-329
Computer networks virtual laboratory	330-334
Computer programs for practical students' exams	335-339
Computer science for bigger. An experience in the university de extremadura.	340-343
Computer supported collaborative learning in mathematics	344-349
Computer use and attitudes among secondary school students: the gender gap remains	350-356
Computer-aided learning in developing countries: possibilities and Difficulties (a case study).	357-359
Computer-based and face-to-face collaborative argumentation: analysing secondary school students' interaction. In the uk and in finland	360-366
Computerised laboratory in science and technology teaching: wireless sensors communicating with the pc	367-371
Computerised laboratory in science and technology teaching: a course on wave phenomena in sound	372-375
Computerised laboratory in science and technology teaching: experiences of secondary school of catering	376-380
Computerised laboratory in science and technology teaching: integrating various aspects of using ict	381-385

Computerised laboratory in science and technology teaching: the course on biological processes	386-390
Computerised laboratory in science and technology teaching: the sensor computer interface	391-394
Computerised laboratory in science and technology teaching: the course on heat and temperature	395-399
Computers in physics education: in situ simulation	400-404
Computer-supported collaborative intercultural education: virtual contact for the reduction of intergroup conflict	405-409
Confusion between presentation and education	410-414
Consolidación de un sistema de gestión del conocimiento. Caso: universidad metropolitana	415-419
Control of learning economic-mathematical disciplines in a distance learning	420-422
Creation of an area for the teaching innovation using new technologies.	423-426
Creation of specialized academic databases In the romanian universities. The rophie case.	427-430
Cscl environments for teaching and learning of physics allowing an exploratory methodology	431-435
Democracy, human rights and tolerance israeli - german student exchange	436-439
Design of activity-based e-learning	440-444
Detection of plagiarism in students' written work using a novel electronic marking assistant	445-449
Develop of multimedia computer application to the practical and interdisciplinary teaching in the education faculty.	450-454
Developing a web-based performance support system to support instructors when using a course management system	455-459
Developing multimedia lessons in the pre-service development of mathematics teachers	460-463
Developing new communities of practice in local authorities in the uk: a case-study of para-information professionals	464-468
Developing reflective thinking and conceptual change through an internet based project: "women in science"	469-472
Development and evaluation of a web-based tool To support university education and administration	473-477
Development of a multi-paradigm programming language e-learning system: idifix project	478-481
Development of an application to handle mechatronic systems via internet	482-486
Development of multimedia materials aimed at conflict prevention in secondary education	487-490
Development of the informatics culture course "representational skills for drawing conceptual diagrams," incorporating e-learning	491-495
Discussion and collaborative, argumentative writing: co-working in a space of debate	496-500
Distance education: a new paradigm of teaching	501-505
Distance tutoring and learning theory in the connet programme	506-510
Distant learning for project management	511-515
Drew : a dialogical reasoning web tool	516-521
Dunes - dialogic and argumentative negotiation educational software – technical realization	522-526
Dynamic access to web contents through voice with php and voicexml	527-530
E- learning: new trends in teacher training	531-535
E-calculo: an e-course on mathematics	536-540
Educação a distância e desenvolvimento cognitivo: facilitação das operações mentais da criança	541-545
Educación a través de internet: estándares técnicos y estándares pedagógicos	546-549

Educational environment integrated in internet and intranet	550-553
Educational information systems creation – web service and agent based development	554-558
Educational practice in virtual laboratories for engineering studies	559-563
E-environment for basic electronic learning (e-bell): a web tool for complementary autonomous study	564-568
El modelo de organización que aprende para el desarrollo del conocimiento	569-572
El rol de la comunicación en las organizaciones que aprenden	573-577
E-learning in higher education: an experience at university of bari	578-581
Elmer: the concretion of a project about virtual university education	582-585
Enhanced computer practices in an internet server for teaching purposes	586-590
Enseñar literatura en la red ii: un ejemplo de crítica hipertextual	591-595
Enseñar literatura en la red. Nuevos recursos digitales.	596-600
E-practice: a web sytem to improve students tutoring	601-605
Ergonomic of computer interfaces	606-609
Eurodans and snugfit: web-based community software for online choreography	610-614
Evaluation of the incorporation of new technologies in the teaching strategy of business science	615-618
Experience with carnet's "training the trainers" online pre-course	619-628
Exploiting virtual learning system in an advanced it course	629-633
Exposure to the knowledge of environmental health messages among communities in indonesia	634-638
Face-to-face and distance teaching/learning Human education interactive network (heinet)	639-642
Feeling evaluation of characters for learning	643-647
Flexible learning models - stories from the coalface	648-654
Formation of communicative competence in non-language students	655-659
Fundamental eye movement analysis using eye camera For visual pointing interface	660-664
Fuzzy graphs for representing domain knowledge structure in intelligent tutoring systems	665-669
Gender differences in asynchronous discussions: a lexical approach	670-673
Generation of computerized adaptive tests in an adaptive hypermedia system	674-678
Guías para la implantación de un e-learning en el ámbito universitario	679-683
Handheld, wireless computers: how they can improve learning and instruction	684-688
Heusklearning: an educational hyperenvironment to learn the basque language	689-694
Histogram setup to recognize arabic calligraphy	695-700
How computers can adapt to user's knowledge: a comparison between traditional computer-based and computer-adaptive tests	701-705
How to potenziare adults' cognitive styles	706-709
Implementation and evaluation of a virtual tutoring system to enhance cyber learning	710-714
Implications of gardner's theory of multiple intelligences on web interface design	715-719
Improving performance using combined buffering and queuing algorithms inside routers in tcp/ip environment (a simulation study)	720-726
Improving quality in university education	727-731
Incorporating project-based learning in high school introductory computer science course	732-736
Influence of interruption of lesson through summer vacation	737-742
On learning of touch-typing skill	737-742
Information and comunication technologies in education: the case of	743-747

distance education laboratory of the federal university of santa catarina – brazil	
Laboratorio financiero virtual con matlab	748-751
Transient analysis of transmission lines: a java tool for understanding wave propagation phenomena	752-756
Un modelo de reutilización basada en componentes para el desarrollo de software educativo en las tecnologías complejas	757-761
Un prototipo de web site para soportar actividades de aprendizaje en la universidad: proyecto te.	762-766
Una propuesta para ambientes colaborativos inteligentes	767-771
Usabilidad y elearning: una convergencia necesaria	772-776
Use of internet to spread botanical knowledge	777-781
Usefulness of e-learning at university	782-786
Using learning strategies to solve discussion problems in an integrated virtual learning environment	787-791
Using multimedia in a constructivist learning environment: a malaysian perspective	792-797
Using multimedia in sports education	798-801
Using the internet in learning english	802-806
Using the theory of conceptual field to evaluate educational software in mathematics	807-812
Using ieee/acm cc2001 for incorporating computer recent innovation into a computer science curriculum	813-819
Virtual campus versus real campus: a reflection on the process of teaching and learning	820-824
Virtual collaborative elearning communities	825-831
Virtual education: a new practise in university teaching	832-836
Virtual environment experience for professional education	837-842
Virtual laboratory to develop distributed applications	843-847
Virtual project rooms for education in designing and research	848-852
Virtual reality and univiversal networking language: a case study for distance learning	853-857
Vocalsearch: supporting blind people to have access to the web	858-862
Vocational education reform in taiwan	863-865
Web visual database of images for design and industrial production	866-871
Web-based language learning: authoring and assessment technologies	872-877
Work group management using a web application	878-882
Workshare space service systems in teachers training. The basis of an experience	883-886
Zonas de proximidad entre la escuela y otros entornos de aprendizaje	887-890
Teachers training for the integration of ict into the practice: proposals for its improvement	891-895
Teaching and learning mathematics with multimedia tools	896-900
Teaching discrete dynamical systems by using mathematica and john conway's game of life	901-905
Teaching innovation in the study of psycho pedagogy: an interdisciplinary project to promote professional development in the area of psycho pedagogy using the tic.	906-910
Teaching/learning in a e-school	911-917
Teaching mathematics in sign language by 3d computer animation	918-922
Teaching physics through the web: fisica in linea (fil), an open structure multimedia platform	923-927
Teaching seasonality with sismo: an on-line interactive seasonal simulator	928-932
Teaching with multimedia: teacher as a multimedia developer	933-938
Teaching-learning strategies involving tools for science education	939-944

Technology and education at the university: a study of case in physical education.	945-950
Testing agent technology in the development of intelligent educational information systems	951-955
The application of leaner-based evaluation, and verbal report technique to work drawing instruction	956-960
The brazilian army education portal	961-965
The challenge of learning in the global village of higher education	966-970
The challenges of learning in virtual world	971-974
The hypertext semantic synopsis as a tool to realize the activity approach in learning	975-979
The impact of e-books on the traditional graphic art communication industry	980-985
The importance of the learning theories for the education in distance	986-989
The improvement in university education with new technologies: an innovation inside the classrooms	990-994
The socratic method: theoretical backgrounds and practice	995-999
The use of symbolic calculus software in the teaching of mathematics at engineering schools	1000-1004
The use of video and computer software in the evaluation of performance of team sports. An application in soccer	1005-1009
The video technology in communication interaction and learning	1010-1014
The virtual laboratory as a complementary element to its real-life counterpart.. Conclusions concerning its application to teaching/learning processes in microbiology and biotechnology	1015-1019
Thematic conversation room in the internet	1020-1024
Theoretical basis for mathematical multimedia software	1025-1029
To explore the strategies of micro electro-mechanical systems cultivation in advanced vocational education in taiwan	1030-1034
Towards a web based system for teaching quantitative geography models	1035-1039
Towards semi-automatic generation of intelligent tutoring systems	1040-1044
Training of secondary school teachers in information and communication technologies	1045-1049
Transformación de un entorno de enseñanza basado en las tic en un entorno de aprendizaje y análisis de los problemas derivados	1050-1054
Offline multimedia applications that inspire: an educational option	1055-1060
On the design of learning contents for 3d virtual environments	1061-1066
On the study of electronic commerce (ec) applied to school education	1067-1070
Online courses favour women	1071-1075
On-line environment for student/teacher information exchange	1076-1080
Online learning and non-traditional adult learners	1081-1086
Online teaching aid - an educational multimedia application for the teaching of multimedia and digital video: an experience with higher education students	1087-1092
Pbl applied to software engineering group projects	1093-1098
Pedagogic consideration of it integration in promoting higher order thinking	1099-1105
Pedagogical research and development in virtual spaces in education	1106-1111
Plan-based models of algebraic competence in elementary algebraic problem solving	1112-1117
Plataforma virtual para universidad europea de arquitectura e ingeniería a distancia.	1118-1122
Possibilities and future perspectives of application of wap technology to teaching support	1123-1127
Power: process-oriented working environment for e -management and e-business	1128-1133
Project engineering curricula: theoretical basis and methodological issues to introduce the collaboration through learning presential and non-presential	1133-1138

Propuesta de una ingeniería del software educativo en respuesta a la crisis del modelo de producción de courseware en la enseñanza actual	1139-1143
Psychometric characteristics of the information needs at the beginning of university studies questionnaire	1144-1147
Quality - intelligent tutoring hypermedia system for training in quality control	1148-1153
Real-time collaborative on-line presentation	1154-1158
Red tecnológica educativa de extremadura	1159-1163
Relation of technology, science, self-concept, interest and gender	1164-1168
Relaxation training with second grade high school children	1169-1172
Relevant utterances: the role of shared tangential student experiences in online classes	1173-1177
Remote laboratories based on virtual processes	1178-1182
Resizing and restructuring of the metrology laboratory at cefet/ma, a didactic-pedagogical improvement through the use of educational technologies	1183-1185
Rooda - en busca de una interface ergonomica	1186-1190
Rotational symmetry: a didactic sequence using cabri-géomètre	1191-1195
Scale: collaborative argumentation-based learning in an interactive intelligent open-based environment	1196-1200
Sharing resources in the tower of babel Lingu@net europa: the virtual languages resource centre <a href="http://www.linguanet-europa.org">www.linguanet-europa.org</a> The challenge of providing multilingual access to quality, on-line resources	1201-1205
Sies: nuevas herramientas cognitivas para la enseñanza de las ciencias, facilitadas por las nuevas tecnologías	1206-1211
Similarity analysis among arabic calligraphy : thuluth	1212-1217
Smart board use in graphical expression engineering teaching	1218-1221
Some applications of fuzzy logic to intelligent tutoring systems	1222-1226
Soutien pedagogique : quelles videos numeriques ?	1227-1231
Strategising e-learning	1232-1236
Strategy reconfiguration modeling for higher education institutions in the context of the bologna declaration	1237-1241
Student guidance and interaction on the web	1242-1245
Student teachers' perspectives of the internet's and internet tools' educational contributions and future usage	1246-1250
Study of activity in a left web site of computer science courses	1251-1255
Supporting information visualization through topic maps	1256-1260
System of tele-education for people with hearing disability	1261-1266
Tablet batches manufactured after the multimedia training are better than the ones manufactured without these previous training?	1267-1271
Main patterns of web and multimedia tools users based on common sight problems in students	1272-1276
Making constructivist philosophy work within web-enhanced and other "blended" courses: an instructional design perspective	1277-1282
Making use of information from the internet: a look at some problems and some solutions	1283-1292
Media competence and cross-cultural experience Due to joint lectures and student e-teamwork	1293-1297
Methodological guidelines for the assessment of the use of the information and communication technologies (ict) in the university framework	1298-1302
Metodología de objetos de aprendizaje En el e-learning como herramienta para la construcción de competencias	1303-1308
Modeling and interchange of enhanced life-long learning profiles	1309-1314
Modulo: monitoring the introduction of a new media concept in lectures of computer science	1315-1319
Motional visual illusions on-line	1320-1324

Multimedia and pharmacy	1325-1329
Multimedia image processing education tool	1330-1334
Multimedia technology and 3d environments used in the preservation and dissemination of portuguese cultural heritage	1335-1339
Multiple intelligent multimedia courseware (mimco): a self-adaptive instruction	1340-1344
Multi-user object-orientated virtual environments (moos) in language education	1345-1348
Mutiny in cyberspace?: theorizing on the potential of esl to facilitate the move from formal to informal educational modes in higher	1349-1354
Neocampus: multi-agent software environment for on-line learning	1355-1359
Network associations of specialists in educational methods of moscow center of internet education	1360-1364
New learning environments: a challenge for the cap <sup>1</sup> teacher and learner.	1365-1368
New media, and virtual reality to create: different learning environment	1369-1373
New orientations in the romanian elearning. The cte case	1374-1378
New technology applied to communication: reinventing education, the interactive student	1379-1383
New ways of teaching with the adoptions of information and communication technologies	1384-1388
Nuevos entornos de aprendizaje: los ambientes colaborativos inteligentes	1389-1393
Ludic and technological tools for education. Robotic mechanisms and their applications in the classroom	1394-1397
Los mapas conceptuales de enfoque: Una técnica para aplicar al hipertexto educativo	1398-1403
Los estudiantes de biología tienen mayor satisfacción y rendimiento académico al aprender con módulos de auto-aprendizaje en internet	1404-1409
L'ordinateur et les competences de communication	1410-1412
Logical procedure of classification using electronic database: a case study	1413-1417
Lessons learned: collaborative creation of a webct prototype for undergraduate special education courses	1418-1421
L'éducation dans la région multiculturelle de la bucovine	1422-1425
Learning with animations and simulations in a computer-based learning environment about torques	1426-1430
Learning to teach mathematics in a virtual learning environment (vle): performance cognitive and technical tools	1431-1435
Learning to develop educational multimedia: a simplified approach	1436-1440
Learning statistics on line. Facts and figures from a three-year experience	1441-1444
Learning progress in students with behavioral attention problems through educational software. Study of three cases	1445-1449
Las funciones y el uso del chat desde los diferentes modelos de racionalidad	1450-1453
Laertis project: a private sector and public institution collaboration for the development of a web-based application to support the needs of peer communication and collaboration in teachers' training	1454-1458
Laborary <sup>®</sup> : a library labs	1459-1463
La plataforma de e-learning como soporte para prácticas de e-business	1464-1468
La manipulación directa en entornos educativos: hacia el aula ubicua con tutormat	1469-1473
La composición de los grupos de desarrollo de material para elearning: ¿ficción o realidad?	1474-1478
Knowledge engineering in multimedia design for special needs training: effectiveness?	1479-1483
Jade - java agents for distance education framework: an agent oriented modeling approach for distributed intelligent learning environment projects	1484-1488
Is there a digital divide between spanish universities? a web based approach	1489-1493

Internet as a learning tool in the “trás-os-montes e alto douro” region	1494-1498
Internet and plurilingual learning - chats in the development of intercomprehension in romance languages	1499-1503
Intergrating web-based learning into the chemistry curriculum - an interactive internet site for chemistry high school teachers and students in israel	1504-1506
Interactive tests for wap devices. An application for law courses in tourism studies	1507-1511
Interactive queries to relational databases through internet and	1512-1515
Interaction between icts and multiliteracies in the understandings of teachers who are charged with implementing educational reform.	1516-1520
Intelligent agents for managing smart school network resource	1521-1525
Integration of audiovisual and multimedia media for teaching: “educative televisión”	1526-1529
Integrating the use of educational software in primary school teaching by shaping learning itineraries	1530-1536
Integrating technology in the k-12 environment: a university, corporate and school partnership	1537-1539
Integrating artificial tutors inside learning environments	1540-1544
Instructional design for web-based activities development	1545-1548
Innovative teaching strategies in university settings – synthesis of technical and didactical presentation training for lecturers	1549-1552
Innovative gateway for learning objects	1553-1558
Information technology education in developing countries: a case study of nepal	1559-1565
3 cases of e-learning in the information society	1566-1570
A constructivist approach in implementing e-learning at two african universities	1571-1575
Estudio de la cinética química mediante experiencias simuladas en un modelo informático implementado en lenguaje java	1576-1580
Calidad de sitios web de formación on-line	1581-1586
Creation of a multimedia program for teaching basketball rules	1587-1591
E-learning in a inorganic chemistry course using integrated collaborative tools	1592-1596
E-learning policy development and implementation in developing countries	1597-1602
The evolution of the virtual campus of the university of pretoria	1603-1607
Teleformación: arquitectura informática flexible y nuevas metodologías	1608-1613
Searching for hypertextuality while training teachers in a distance learning experience	1614-1617
Making digital resources in the humanities accessible to students and scholars with disabilities	1618-1623
Virtual and hands-on experiments for distant education	1624-1627
Una propuesta de formación online desde la página web de la axencia para a calidade do sistema universitario de galicia	1628-1631
Instructions to transform a web into accesible	1632-1634
Proyecto teddi: la realidad tecnológica en las aulas	1635-1637
Proyecto teddi <a href="http://www.teddi.ua.es">http://www.teddi.ua.es</a>	1638-1641
Road safety training by multimedia	1642-1645
Website aula magna. La concordia	1646
University students use of web resources	1647-1648
Analysing the electronic discussion and interaction of different groups of pre-university students based on their academic standing	1649-1655

Computadoras en la enseñanza: una metodología para el uso de laboratorios virtuales de física con empleo de materiales educativos computarizados.	1656-1660
Aprendizaje autodirigido en y para la formación docente: hacia un modelo instruccional en línea.	1661-1664
E-learning – using internet projects to connect students	1665-1670
Application on CRM technologies in the distance learning enviromnet	1671-1674
Computerized laboratory in science and technology teaching: course in machine elements	1675-1679
Enseñar a los demás y aprender de los demás.	1680-1685
El aprendizaje colaborativo en el e-learning	1680-1685
Expanding student support through online learning communities: a sample project at the university of south africa	1686-1691
Las nuevas tecnologías un espacio intangible pero real	1692-1696
On line learning and professional development of post graduate students; pedagogical practice and e-learning in higher education	1697-1703
Prácticas virtuales interactivas sobre el movimiento oscilatorio a través de internet	1704-1709
The development of advisers in information communications technology (ICT) in support of small medium enterprise businesses	1710-1715
Aplicación para la creación de cd-rom personalizables con contenidos educativos a partir de bases de datos	1716-1720
Computer science in the systematic search of business opportunities	1721-1724
Dunes - dialogic and argumentative negotiation educational software pedagogical realizationn - the case	1725-1729
Developing multimedia educational material in a virtual collaborative community	1730-1734
ARTICULA: Herramienta informática de gestión de la información bibliográfica de investigación	1735-1740
