

## CONTENTS

### VOL. 1

<b>Introduction</b> .....	XV
---------------------------	----

### Applications in Biology and Medicine

<b>Approaches for Investigating Mechanobiological Dynamics in Living Cells with Fluorescence and Atomic Force Microscopies</b> A.E. Pelling, B. M. Nicholls, Y.R. Silberberg, and M.A. Horton.....	3-10
<b>Challenges and Approaches - Probing Tumor Cell Invasion by Atomic Force Microscopy</b> T. Ludwig, R. Kirmse and Kate Poole.....	11-22
<b>Study of Cancer Cells Used Atomic Force Microscopy</b> K. Tomankova, H. Kolarova, M. Vujtek and H. Zapletalova.....	23-28
<b>Atomic Force Imaging of Ocular Tissues: morphological study of healthy and cataract lenses</b> A. Antunes, F. V. Gozzo, M. I. Borella, M. Nakamura, A. M. V. Safatle, P. S. M. Barros and H. E. Toma.....	29-36
<b>Imaging of Bone Ultrastructure using Atomic Force Microscopy</b> P. J. Thurner, E. Oroudjev, R. Jungmann, C. Kreutz, J. H. Kindt, G. Schitter, T. O. Okouneva, M. E. Lauer, G. E. Fantner, H. G. Hansma, and P. K. Hansma.....	37-48
<b>Cell Surface Membrane Remodelling and Mitochondrial Remodelling in Live Neurons: Practical Approaches for Studying Dynamic Processes Using Confocal Microscopy</b> N. Shulyakova, P. Kaifosh, D. Diec, and L.R. Mills.....	49-59
<b>Cell-surface interaction in biomedical implants assessed by simultaneous fluorescence and reflection confocal microscopy</b> J. Vilches, J.I. Vilches-Perez and M. Salido.....	60-67
<b>The combined application of AFM and LSCM: Changing the way we look at innate immunity</b> E. L. Adams and K. J. Czymmek.....	68-76
<b>Electron Microscopy Visualization of the Cell Surface of Trypanosomatids</b> W. de Souza.....	77-87
<b>Extending the Explanatory Power of Live Cell Imaging by computationally modelling the Execution of Apoptotic Cell Death</b> H. Huber, G. Gomez Estrada, H. Dussmann, C. O'Connor and M. Rehm.....	88-99

<b>In vivo and in vitro Approaches for the Study of Adult Neurogenesis in Light, Confocal, and Electron Microscopy</b>	
N. Canalia, M. Armentano, G. Ponti and L. Bonfanti.....	100-110
<b>Microscopy studies on uncultivated magnetotactic bacteria</b>	
T. S. Silveira, J. L. Martins, K. T. Silva, F. Abreu and U. Lins.....	111-121
<b>Scanning Electron Microscopy and Transmission Electron Microscopy of Mollicutes: Challenges and Opportunities</b>	
C. T. K.-H. Stadtländer.....	122-131
<b>Non-Invasive Fourier Transform Infrared Microspectroscopy and Imaging Techniques: Basic Principles and Applications</b>	
P. Garidel and M. Boese.....	132-143
<b>Contribution of Electron Microscopy to the Study of the Nuclear Pore Complex Structure, Composition, and Function</b>	
N. Panté.....	144-153
<b>Bright Solutions to Get Sharp Images: Confocal and Two- Photon Fluorescence Microscopy and the Pros and Cons of New Multifocal Approaches</b>	
R. Kurtz.....	154-163
<b>Microscopy techniques and the study of synapses</b>	
E. Perez-Costas, M. Melendez-Ferro and R.C. Roberts.....	164-170
<b>Microscopic Investigations in Neurodegenerative Diseases</b>	
R. J. Castellani, B. A. Alexiev, D. Phillips, G. Perry and M. A. Smith.....	171-182
<b>Studying the temperature-dependent events of live cells under confocal and epi-fluorescence microscopy using a solid-state heating/cooling system</b>	
Zu-Han Huang, Huei-Hsuan Cheng, Huei-In Wu, Shin-Hua Tseng and Yen-Chung Chang.....	183-189
<b>Live imaging genetically-encoded fluorescent proteins in embryonic stem cells using confocal microscopy</b>	
J. Artus and A.-K. Hadjantonakis.....	190-202
<b>Correlative Fluorescence- and Scanning, Transmission Electron Microscopy for Biomolecular Investigation</b>	
K. Jahn, D. Barton and F. Braet.....	203-211
<b>Immunolocalization of maize transglutaminase and its substrates in plant cells and in Escherichia coli transformed cells</b>	
M. Santos, E. Villalobos, P. Carvajal-Vallejos, E. Barberá, A. Campos and J.M. Torné.....	212-223
<b>Visualization of the real microarchitecture of glycoprotein matrices with scanning electron microscopy</b>	
G. Familiari, M. Relucenti, A. Familiari, E. Battaglione, G. Franchitto and R. Heyn.....	224-228

<b>Use of standard fluorescence microscopy to assess modifications in the plasma membrane potential and in the intracellular concentration of inorganic ions in cultured cells</b>	
S. Chifflet and J.A. Hernández.....	229-236
<b>Imaging biological structures with a proton microprobe</b>	
T. Pinheiro, M.D.Ynsa and L.C.Alves.....	237-244
<b>Macromolecular Synthesis in Hepatocyte Mitochondria of Aging Mice as Revealed by Electron Microscopic Radioautography I: Nucleic Acid Synthesis</b>	245-258
T. Nagata.....	
<b>Macromolecular Synthesis in Hepatocyte Mitochondria of Aging Mice as Revealed by Electron Microscopic Radioautography II : Protein Synthesis</b>	
T. Nagata.....	259-271
<b>Size Estimation of Protein Clusters in the Nanometer Range by Using Spatially Modulated Illumination Microscopy</b>	
U. J. Birk, I. Upmann, D. Toomre, C. Wagner and C. Cremer.....	272-279
<b>Transglutaminase activity and localization during microspore induction in maize</b>	
M. Santos, J. Alché , M.I. Rodríguez-García and J.M.Torné.....	280-286
<b>A Thousand Proteins of Light: 15 Years of Advances in Fluorescent Proteins</b>	
G. McNamara and C.A. Boswell.....	287-296
<b>Using Total Internal Reflection Fluorescence Microscopy, DNA Curtains, and Quantum Dots to Investigate Protein-DNA Interactions at the Single-molecule Level</b>	
M-L. Visnapuu, D. Duzdevich and E. C. Greene.....	297-308
<b>Fluorescence Resonance Energy Transfer using molecular beacon as a probe, a new approach for in vivo macromolecular interaction study</b>	
S. Ganguly.....	309-315
<b>Electron-microscopic and genetic dissection of arthropod cuticle differentiation</b>	
H. Schwarz and B. Moussian.....	316-325
<b>Microscopy and egg morphology of Mayflies</b>	
N. Ubero-Pascal and M.A. Puig.....	326-335
<b>Role of Scanning Electron Microscopy in Understanding Insect Corneal Nipple and Other Structures</b>	
S. Dey.....	336-344
<b>Antennal sensilla of hymenopteran parasitic wasps: variations linked to host exploitation behavior</b>	
J. van Baaren, G. Boivin, D. Bourdais and O. Roux.....	345-352

<b>The application of confocal microscopy and 3D imaging software in Functional, Evolutionary, and Developmental Zoology: reconstructing myo- and neurogenesis in space and time</b>	
A. Wanninger.....	353-361
<b>Comparative study of the impact of the actin cytoskeleton on cell shape and membrane surface in mammalian cells in response to actin toxins</b>	
F. Lázaro-Diéguez and G. Egea.....	362-369
<b>Chromosomes in Focus: Basic Cytogenetics, Light Microscopy and the Case of Neotropical Fish</b>	
P.R.A.M Affonso, V S. Miranda, A. S. Medrado, U. P Jacobina, J. A. Bitencourt, J. S. Almeida and P. L. S. Carneiro.....	370-377
<b>The Nuclear Area Factor (NAF): a measure for cell apoptosis using microscopy and image analysis</b>	
M. A. DeCoster.....	378-384
<b>Study of the Mechanisms of Action of Medicines in the Immune System Using Microscopy</b>	
C. Camargo de Oliveira and D. de Freitas Buchi.....	385-393
<b>Probing the Structure and Function of Mammalian Sperm using Optical and Fluorescence Microscopy</b>	
J. Ramalho-Santos, A. Amaral, A.P. Sousa, A.S. Rodrigues, L. Martins, M. Baptista, P.C. Mota, R. Tavares, S. Amaral and S. Gamboa.....	394-402
<b>Super-Quiet Microfluorometry: Examples of Tumor Cell Metabolic Dynamics</b>	
A.J. Clark and H.R. Petty.....	403-408
<b>Real-time visualization of developing viral infection in fibroblasts</b>	
K.L. Lathrop and A. Eisfeld.....	409-416
<b>Morphology of the developing fetal lung – the rabbit experimental model</b>	
X I. Roubliova , J. M. Biard, L. Ophalvens, D. Gallot, J.C. Jani , E.K.Verbeken, C.P. Van de Ven, D. Tibboel and J.A. Deprest.....	417-425
<b>3D visualization and analysis of cell-matrix transformations in whole-mount and live embryos using confocal and multi-photon microscopy</b>	
G.G. Martins, P. Rifés, R. Amândio, P. Campinho, I. Palmeirim and S. Thorsteinsdóttir.....	426-433
<b>Utilization of the Laser Induced Plasma Spectroscopy for monitoring of the metal accumulation in plant tissues with high spatial resolution</b>	
J. Kaiser, M. Galiová, K. Novotný, L. Reale, K. Stejska, O. Samek, R. Malina, K. Páleníková, V. Adam and R. Kizek.....	434-441
<b>Quantitative Microscopic Analysis of Histological Sections of Brain Tissue</b>	
R. A. Armstrong.....	442-452

<b>Ultrastructural Changes In Microcoleus chthonoplastes Growing In the Presence of Crude Oil. Applications for Ecological Studies</b> E. Diestra, I. Esteve, O. Castell and A. Solé.....	453-460
<b>Correlation Between flow Cytometry and Transmission Electron Microscopy</b> A. Alvarez, F. Goñi de Cerio and E. Hilario.....	461-468

## VOL. 2

<b>Introduction.....</b>	XV
--------------------------	----

### Applications in Physical/Chemical Sciences

<b>Scanning Force Microscopic Study of Surface Structure and Surface Properties of Organosilane Monolayers</b> T. Koga and A. Takahara.....	471-482
<b>Nano-Structuring and Molecular Domain Organizations in Lipid-Protein Membranous Interfaces</b> K. Nag, A.K. Panda, R. Devraj and M. Fritzen-Garcia.....	483-490
<b>Nanolubrication studied by Contact-Mode Atomic Force Microscopy</b> R. Buzio and U. Valbusa.....	491-499
<b>Experimental contribution to the understanding of wetting of solid surfaces at the meso- and nano-scale using dynamic AFM</b> A.B. Jódar-Reyes, A. Méndez-Vilas and M.L. González-Martín.....	500-512
<b>Usage of AFM, SEM and TEM for the research of carbon nanotubes</b> K. Safarova, A. Dvorak, R. Kubinek and M. Vujtek A. Rek.....	513-519
<b>Atomic Force Microscopy as a tool for unravelling the relationship between morphology and growth dynamics of organic semiconductors</b> M. Campione, M. Moret and A. Sassella.....	520-527
<b>AFM monitoring of size changes during thermal syntheses of ferric oxide nanoparticles</b> M. Vůjtek, R. Kubínek, R. Zbořil and L. Machala.....	528-533
<b>Various approaches to control solid/solid wetting self-assembly of organic semiconductors with STM</b> F. Trixler and W.M. Heckl.....	534-541
<b>Dephasing of charge and spin in semiconductor quantum dots</b> W. Jacak, J. Krasnyj, and L. Jacak.....	542-549

<b>Investigation of the nanostructured surface of single-crystal silicon by the method of scanning tunnel spectroscopy</b> S.P. Kulyk, M.M. Melnichenko, K.V. Svezhentsova and O.M. Shmyryeva.....	550-559
<b>Electrically characterization of Group III-Nitride nanocolumns with Scanning Force Microscopy</b> M. Niebelschütz, V. Cimalla, O. Ambacher, T. Machleidt, K.-H. Franke, J. Ristic, J. Grandal, M.A. Sánchez-García and E. Calleja.....	560-567
<b>Field Emission Scanning Electron Microscopy for Structural Characterization of 3D Gold Nanoparticle Superlattices</b> H. Yao and K. Kimura.....	568-575
<b>UV-VIS and TEM assessment of morphological features of silver nanoparticles from phosphate glass matrices</b> L. Baia and S. Simon.....	576-583
<b>Evaluation of electronic and geometric properties of nanoparticles using X-PEEM</b> O. Seifarth.....	584-592
<b>Examination of dentin surface using AFM and SEM</b> R. Kubinek, Z. Zapletalova, M. Vujtek, R. Novotný, H. Kolarova and H. Chmelickova.....	593-598
<b>TEM analysis of the early mineralization process of mantle dentin</b> P. Dechichi, C. Christian Gomes Moura, A. Wilsson de Almeida Filho and J. Carlos Gabrielli Biffi.....	599-605
<b>Spatial visualization of thermally sprayed microstructure based on light microscopy</b> P. Ctibor and R. Lechnerova.....	606-615
<b>Analytical electron microscopy of tremolite</b> K.N. Bozhilov and D.M. Jenkins.....	616-625
<b>Investigating morphological changes on octadecyl modifiedsilicas by SEM and AFM</b> R. Brambilla, F. Silveira and J.H.Z. dos Santos.....	626-633
<b>Importance of Transmission Electron Microscopy for Carbon Nanomaterials Research</b> P.R. Somani and M. Umeno.....	634-642
<b>Discovering the True Morphology of Amphibole Minerals: Complementary TEM and FESEM Characterization of Particles in Mixed Mineral Dust</b> K. E. Harris, K. L. Bunker, B. R. Strohmeier, R. Hoch and R. J. Lee.....	643-650
<b>Single-Molecule Fluorescence Imaging Techniques for the Detection of Reactive Oxygen Species</b> T. Tachikawa and T. Majima.....	651-659

<b>Scanning Electron Microscopy Investigation of Lead-Free High Refractive Index Glass Prepared from Local Sand Used for Restoration and Conservation</b> P. Dararutana and N. Sirikulrat.....	660-665
<b>SEM and TEM studies in alloys developed by mechanical alloying</b> J.J. Suñol and L. Escoda.....	666-670
<b>Scanning Electron Microscopic Characterization of Copper (II) Phthalocyanine Nanocrystallites Thin Films Deposited on Technologically Important Substrates</b> B. Mallik and S. Karan.....	671-682
<b>Surface Morphological Study of Low Temperature Plasma Treated Wool – A Time Dependence Study</b> C.W. Kan.....	683-689
<b>Fluorescence and Scanning Electron Microscopy of Chitosan/DNA Nanoparticles for Biological Applications</b> A. Masotti, F. Marino, G. Ortaggi and C. Palocci.....	690-696
<b>A Novel “In-situ-tracking” Approach for Evaluating Microstructural Variations Using SEM, EDS and EBSD and Its Applications in Materials Science</b> C. Pan, Y. Huang and Q. Fu.....	697-703
<b>Morphology Variations of Polypropylene</b> J. Výchopňová, R. Čermák and M. Obadal.....	704-712
<b>Morphological Transition of Isotactic Polybutene-1 Tetragonal Crystals: Optical and Transmission Electron Microscopy Observation</b> M. Yamashita and T. Takahashi.....	713-718
<b>Nanostructure of starch high-pressure treated granules discovered by low temperature scanning electron microscopy</b> A.D. Molina-García, E. Horridge, P.D. Sanz and M.N. Martino.....	719-725
<b>Nanoscale Structure of Cellulosic Materials: Challenges and Opportunities for AFM</b> A.T. Paiva, S.M. Sequeira, D.V. Evtuguin, A.L. Kholkin and I.Portugal.....	726-733

## Techniques

<b>Atomic Force Microscope Nanoindentations to Reliably Measure the Young’s Modulus of Soft Matter</b> D. Tranchida, Z. Kiflie and S. Piccarolo.....	737-746
<b>The Atomic Force Spectroscopy as a Tool to Investigate Surface Forces: Basic Principles and Applications</b> F.L. Leite, L.H.C. Mattoso, O.N. Oliveira Jr and P.S.P. Herrmann Jr.....	747-757

<b>A Guide for Atomic Force Microscopy Analysis of Soft-Condensed Matter</b> M. Raposo, Q. Ferreira and P.A. Ribeiro.....	758-769
<b>Scanning Probe Microscopy-Based Nanofabrication for Emerging Applications</b> X. Liu and H. Zhang.....	770-778
<b>Exploring the high pressure SEM</b> C. Mathieu, L. Khouchaf and A Kadoun.....	779-786
<b>How to study biological samples by FIB/SEM?</b> M. Milani, D. Drobne and Francesco Tatti.....	787-794
<b>Very Low Energy Scanning Electron Microscopy</b> I. Müllerová and L. Frank.....	795-804
<b>The magnetic force microscopy and its capability for nanomagnetic studies - The short compendium</b> A. Hendrych, R. Kubínek and A.V. Zhukov.....	805-811
<b>Visualisation of Small Fluid Droplets on Biological and Artificial Surfaces Using the Cryo-SEM Approach</b> S.N. Gorb, D. Voigt and E.V. Gorb.....	812-819
<b>Spherical AFM Probes for Adhesion Force Measurements on Metal Single Crystals</b> B. Stegemann, H. Backhaus, H. Kloss and E. Santner.....	820-827
<b>Near-Field Optical Microscopy of Surface Plasmon Polaritons Nano-Optics</b> Víctor Coello.....	828-839
<b>Semiconductor nanocrystals and fluorescence microscopy in biological labeling</b> P.M.A. Farias, B.S. Santos, A.Fontes and C.L. Cesar.....	840-847
<b>Fluorescence Correlation Spectroscopy of Living Cells</b> G. Vereb, L. Ujlaky-Nagy, E. Friedländer G. Vámosi and J. Szöllősi.....	848-854
<b>Fluorescence Correlation Spectroscopy: an Experimentalist's View of the Basics</b> G. Jung.....	855-862
<b>Linear fluorescence unmixing in cell biological research</b> B. Kraus, M. Ziegler and H. Wolff.....	863-872
<b>High resolution Near-field Fluorescence Microscopy: from principles to applications in cell biology</b> A. Cambi, C.G. Figdor and M.F. Garcia-Parajo.....	873-880
<b>Two-Photon Fluorescence Microscopy: Basic Principles, Advantages and Risks</b> S.J. Mulligan and B.A. MacVicar.....	881-889

<b>Colours Count: how the Challenge of Fluorescence was solved in Confocal Microscopy</b>	
R. Borlinghaus.....	890-899
<b>Software-based three dimensional reconstructions and enhancements of focal depth in microphotographic images</b>	
J. Piper.....	900-905
<b>Digital Deconvolution Microscopy: Development, Evaluation and Utilization in 3D quantitative studies of E-cadherin expression in skin of Bufo arenarun tadpoles</b>	
J.F. Adur, J.E. Diaz-Zamboni, N.B. Vicente, M.F. Izaguirre and V.H. Casco.....	906-916
<b>Concurrent 3-D Visualization of Multiple Microscopic Structures</b>	
S.J. Rehorek and T.D. Smith.....	917-923
<b>Principles of automatic vision systems for tracking elongated microorganisms</b>	
N. Babaii Rizvandi, D. Ochoa, A. Pizurica and W. Philips.....	924-930
<b>Registration Decisions during 3D Medical Volume Reconstructions from Confocal Laser Scanning Microscopy</b>	
P. Bajcsy and Sang-Chul Lee.....	931-938
<b>An introduction to low dose electron tomography- from specimen preparation to data collection</b>	
G. Rh. Owen and D.L.Stokes.....	939-950
<b>Temperature controlled Microscopy</b>	
A. Holzinger.....	951-955
<b>An introduction to diffractive tomographic microscopy</b>	
O. Haeblerlé, A. Sentenac and H. Giovannini.....	956-967
<b>Scanning ion conductance microscopy—a tool to investigate electrolyte-nonconductor interfaces</b>	
P. Happel , F. Wehner and I. D. Dietzel.....	968-975
<b>In Situ X-Ray Microscopy at High Temperature and Pressure</b>	
B. Ménez, H. Bureau, J. Cauzid, V. Malavergne, A. Somogyi, A. Simionovici, M. Munoz, L. Avoscan, C. Rommevaux-Jestin and B. Gouget.....	976-988
<b>Equipment for coupling a digital camera to a optical microscopy</b>	
A.P. de Novaes, P.S. de Paula Herrmann Jr., R. Bernardes Filho and F.M. Benetti.....	989-995
<b>Virtual Microscopy in Medical Images: a Survey</b>	
E. Romero, F. Gómez and M. Iregui.....	996-1006

---

<b>Laurdan Generalized Polarization: from cuvette to microscope</b> S. A. Sanchez, M.A. Tricerri, G. Gunther and E. Gratton.....	1007-1014
<b>Practical Aspects of Immunomicroscopy on Plant Material</b> S. Marttila and K. Santén.....	1015-1021
<b>Electron Microscopy in Developing Countries: What can be done to get these countries more involved?</b> V. B. Meyer-Rochow.....	1022-1027
<b>Inexpensive Digital Microscopy Workstations Engage Students in Integrative Biology</b> G. S. Withers and C. S. Wallace.....	1028-1033
