

TABLE OF CONTENTS

Introduction	IV
Advances of photo-initiated polymerization: kinetics, fundamental and biomedical applications <i>A. Jui-Teng Lin</i>	1-8
Direct fluorination of polymer insulation for HVDC cable accessory <i>B. X. Du, Z. L. Li, J. Li and M. Xiao</i>	9-18
Modification of Polyacrylonitrile (PAN) fibers to improve affinity to anionic components <i>Muhammad Umair Khan and Boris Mahltig</i>	19-26
Polymers and nanotechnology, the new face of bioactive edible coatings <i>N. M. De la Fuente-Salcido, A. M. Alejo-Andrade, K. M. Favela González and J. E. Marszalek</i>	27-35
Polyvinylbutyral (PVB) coatings for optical modification of textile substrates <i>T. Grethe, A. Schwarz-Pfeiffer, C. Grassmann, E. Engelhardt, S. Feld, F. Guo, M. De Vrieze, B. Mahltig</i>	36-45
Recycled polystyrene used as support of iron oxide nanoparticles elaborated by green synthesis, and its application in wastewater treatment <i>C. De León-Condés, G. Roa-Morales, G. Martínez-Barrera, P. Balderas-Hernández, C. Menchaca-Campos and F. Ureña-Núñez</i>	46-53
Synthesis and characterization of GAP-based mesoporous energetic polymers <i>Guoping Li, Haoxue Dong, Menghui Liu, Min Xia, Chunpeng Chai, Yunjun Luo</i>	54-61
Synthesis, Characterization and Swelling behavior of superabsorbent hydrogel, H-Na-PCMSA-g-PAN <i>Jignesh H. Trivedi, and Mitesh K. Prajapati</i>	62-75
Topological "Interfacial" Polymer Chemistry <i>Takeru Yunoki, Shuhei Hirayama and Atsuhiko Fujimori</i>	76-87
Water vapor permeability of nonwoven fabric coated with thermosensitive polyurethane films obtained from isophorone diisocyanate and polyester or polyether polyol <i>A. Morel, G. Bedek, D. Dupont and F Salaiin</i>	88-95
“Project Oriented Learning” and “Open Outcome Labs” in the Education of Young Researchers in Polymer Science and Technology <i>A. Kandelbauer and R. J. Lehnert</i>	96-105
